

CYBERSECURITY

We help organizations **in preserving the confidentiality, integrity and availability** of their business information, together with its authenticity, reliability, non-repudiation and responsibility in the security and protection of the information in each of its risk states.

Likewise, we seek to protect digital data, through the treatment of threats that put at risk the information processed, stored and transported by the information systems that are interconnected.

Our hallmark

In the PRAXIS Security specialty, we understand the importance of cybersecurity, therefore, we develop solutions based on a deep understanding of your business needs and objectives, supporting the **definition, implementation and optimization** of the security posture and work within of that evolutionary trajectory.
