BA & BPM

UNSUCCESSFUL PROJECTS AND OPERATIONAL DEFICIENCY?

In an organization, most initiatives that do not end successfully are associated with a partial definition of the project scope and processes that are undefined or unidentified, as well as constant changes in requirements, besides the absence of a global vision of the organization's capacities, a deficient planning, the limited participation of the areas involved, and a lack of executive support. All of this, causes expenses in solutions that are not effective and that, in the medium term, will consume resources for updates and renewals.

These "half-hearted" solutions have a negative impact on the budget, performance and prestige of the organization, besides not supporting it in the fulfillment of business strategies.

VERSATILE SOLUTIONS WITH A HIGH RETURN OF INVESTMENT

At PRAXIS, we have more than 20 years of experience in the IT market. We have vast experience in BA (Business Analysis), a specialty focused on understanding the policies, operations and structure of an organization, to recommend technological or business solutions (initiatives) to meet the goals.

Among the main competitive advantages that distinguish us, we can mention: the availability of consultants and specialized services, highly experienced in the analysis and automation of processes with BPMS tools (TIBCO®, ORACLE®, AURAPORTAL®, among others).

Our specialty in BPM (Business Process Management) focuses on analyzing, documenting and modeling business processes through business architecture tools, to have a comprehensive and up-to-date vision of the organizational structure, aligning processes, data, applications and technological infrastructure to your business architecture. In addition, we automate business processes (BPMS) to manage and monitor them, thus generating results that positively impact customers.

Our methodologies, and follow-up model to consultants, have made us the perfect ally of visionary executives who seek a high return on investment, flexible and agile attention to changes and business opportunities, in order to be at the forefront of global trends.

In PRAXIS, we know the needs of our clients, that is why we offer the BA & BPM services in an comprehensive manner or separately.
