CLOUD

The specialty of Cloud offers greater agility, lower costs and access to advanced solutions and a wide range of experts specialized in cloud technology, as well as the design of the solution architecture and professional services for the migration or implementation of the proposed Cloud technology. In a multi-cloud world, our main interest is to support our customers in their transition to the cloud and to offer them the benefits and advantages of this model.

CLOUD

DO YOU KNOW IF YOUR TECHNOLOGICAL SOLUTIONS ARE EFFICIENT?

Nowadays, companies require high investments in the acquisition of new inputs, infrastructure and resources for production, as well as the recurring expense in maintenance and repair of their IT infrastructure. This operating behavior represents a negative impact for their organization, caused by the lack of strategy for the acquisition of efficient technological solutions that adapt to this demand for tasks, optimizing the use of their resources.

COMPREHENSIVE CUSTOM-MADE SOLUTIONS

At PRAXIS, we have more than 20 years of experience strengthening companies in Information Technology solutions. Through the Cloud specialty, we provide solutions that guarantee data access, business applications from anywhere in the world, continuity of applications operation and the required infrastructure growth in leading market technologies that comply with national and international standards.

We deliver a managed service provided by consultants and tools, that monitor the operation, performance and service levels contracted.

FEATURES

- Solutions based on standard cloud technologies and the recommended architecture, whether public, private or hybrid.
- Solutions based on infrastructure models such as services (IaaS), platform as a service (PaaS) and as a service (SaaS).
- Delivery of managed or unmanaged cloud, the solution adapts to your needs.
- Specialized consulting during the stages of the project.
- Easy implementation.
- Technical support 7x24x365.
- Strategic alliances with data centers in Mexico and outside the country.
- Protection of investment by allowing coexistence of past, present and future technologies.
- Flexible pricing model, pay as you need (Pay as you go).
- Factory software backup, which allows the integration of solutions for projects that require it with the best specialized development personnel.
- Support from leading suppliers and manufacturers in the market.
- Obtaining higher levels of security against today's emerging threats, greater visibility and prevention.
- Optimized availability of services delivered with agile and mission-critical computing.

SERVICES

- Cloud storage.
- Virtual servers.
- Dedicated servers.
