CONSULTING

At PRAXIS we define ourselves according to the workforce needs and intellectual capital, gaining efficiency and productivity for the company.

We are an international company with more than 20 years of experience, a leader in projects with specialized methodologies and tools, strategically focused on consulting, integration, outsourcing and systems development. Through the appropriate use of information technologies, we seek to strengthen the development of companies.

FEATURES

- Control of personnel and tasks through the use of MATS®.
- Method of variable compensation.
- Staff training through online certifications.
- Evaluation of personnel through systems specialized in psychometrics.
- The broadest and most qualified candidates pool in the industry.
- More effective recruitment sources.
- Over 15,000,000 man-hours applied to the needs of our customers.
- Consultants specialized and certified as PMP's by the PMI®.

For us, it is very important to have trained, committed and professional personnel to help us continue writing successfully the history of our clients. For this reason, we are committed to provide the best working environment, an effort that the "Expansión" magazine has recognized by classifying us, for 10 years, as "Top Company" (2007, 2008, 2009, 2012, 2013, 2014, 2015, 2016, 2017 and 2018).

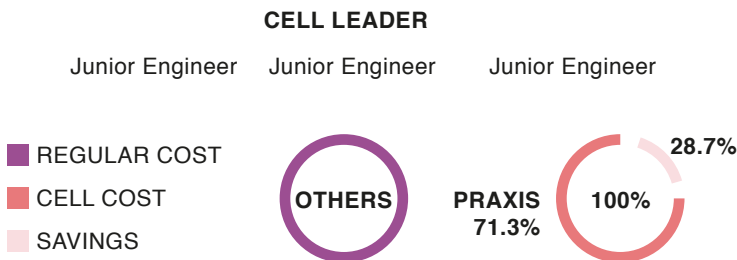

CONSULTANCY PER CELL

Due to the obtained success and the need to constantly innovate, at PRAXIS we have developed a new consultancy system called "consultancy per cell", whose objective is to increase the company's investment in personnel, through a more efficient scheme that includes a leader and three junior engineers. This is how they are designated, in order to achieve the productivity levels of four senior engineers.

An analytical process is carried out as well, where the results are measured and reviewed permanently, by means of a regime whose implementation implies that all the members of the cell operate under the MATS® standards (Task Management Methodology).

MATS®

- Supervision and control of requirements.
- Definition of objectives aimed at reaching and exceeding customer goals.

BENEFITS

Tangible results thanks to the supervision of the staff.

High productivity supported by payment based on results.

Cutting-edge applications, that result from the business knowledge of our consultants.

Personnel specialized in business areas.

Short response time which guarantees a fast Go to Market.

More motivated staff that brings economic benefits to the organization.

Savings of time and money.

Lower staff turnover.

Increase in the number of projects successfully completed in time, cost and quality.

The proposed scheme was designed to be more productive than the current one.

The client interacts with the cell leader to whom he hands out the tasks.

The cell will be taken in periods of 12 to 18 months.

The client and PRAXIS, together, select the leader of the cell.
