INFRASTRUCTURE

LOW PRODUCTIVITY AND EFFICIENCY?

Right now, some companies have a low productivity and an excessive growth in their systems area, which is not optimal for the development of their businesses. To a large extent, this situation is due to the fact that organizations do not give adequate strategic importance to their systems infrastructure that supports their operation and growth. This is one of the reasons why, nowadays, companies begin to focus on implementing a more efficient infrastructure; they want their investments in technology, equipment, maintenance, adaptation of physical spaces, updates and payroll of staff, to generate a business value.

MANAGED SERVICE

At PRAXIS, for more than 20 years we have facilitated the management of IT support by simplifying multiple contracts and providing technical support through a single point of contact.

SPECIALIZED TECHNOLOGY

We help organizations to make the most of their infrastructure, easily and in a short period of time; through our specialized knowledge in technologies, industries and methodologies based on the best practices worldwide. We align the IT area to the needs of the business.

DATA CENTER

We have the experience to develop projects that include design, installation, tuning and maintenance of your Data Center's communications area: topology, structured wiring, connectivity, nodes sampling, rack, active equipment, documentation and logbooks.

SPECIALIZED TECHNICAL SUPPORT

We are specialists in the installation, configuration and maintenance of different technological platforms such as IBM®, SUN®, UNISYS®, among others. We have consultants certified in Windows® y Linux®. We take part of server virtualization projects, and we are experts in databases.

BENEFITS

Reduction of time spent in managing several providers to meet the technical support needs of your Data Center and your entire network.

Reduction of operation costs, maintenance, as well as the time of implementation.

Services supported by processes that are based on the best practices of the industry worldwide.
