SAP

IS THERE A MISMANAGEMENT IN THE ORGANIZATION?

Due to the lack of tools and difficulty to adapt to regulatory, and operational changes, duplication of functions, as well as an inadequate segregation of functions, and a lack of administrative integration, many organizations waste time and money trying to obtain timely information for decision making. All this causes a vacuum of standard processes that comply with the regulations and the best practices of each industry. In addition, it hinders the Go-to-Market, reduces competitiveness to companies and prevents delivering results in real time.

OPTIMIZE YOUR OPERATIONAL STRATEGY

At PRAXIS, we have more than 20 years of experience specializing in the improvement of business systems through specific technology and industry solutions that increase productivity, mitigate risks, save money and adapt to regional and global technology. We operate with methodologies based on PMI®, CMMI®, TMMI®, IIBA®, ITIL® and on the best practices of each industry, worldwide. We are the integral support of the operative and strategic areas of the organizations.

We maximize the value of SAP's investment.

IMPLEMENTATION, MAINTENANCE AND SUPPORT

At PRAXIS we offer visibility of business operations, integration of areas in a transparent manner and the easy adoption of innovative technology.
